About Jaunt System Limited

Jourive, the business name of Jaunt System Limited, provides Hong Kong's first paperless Electric Vehicle rental service.

Through a simple online platform, improve the eco-environment, the ease and the enjoyment, where individuals can rent Electric Vehicles to enjoy their journey

Jourive was created with two things in mind: the ***journey*** and the ***drive***:

The ***journey*** isn't just about the scenic views, rather the whole process. From accessing their website and booking, to looking cool while driving a slick car, all the way to the returning process. The journey commences in just a few swift swipes on your phone.

The ***drive*** doesn't just get you from point A to B, rather, everything about that drive. The feel-good factor behind driving a zero-emission vehicle, saving the earth one ride at a time, as well as the many faucets of assistive driving features, such as Tesla's autopilot mode, making driving so much easier.
