Hong Kong is in the midst of a transformative period marked by rapid advances in innovation and technology (I&T). In 2024–25, Cyberport continued working tirelessly in support of the HKSAR Government's initiatives to turn the city's I&T sector into a key economic driver. Our community made progress in areas like AI, FinTech, GreenTech, EdTech, Smart Living, the low-altitude economy (LAE) and more, backed by Cyberport's critical role as an incubator. The future for AI in Hong Kong is particularly bright following the launches of Cyberport's **AI Supercomputing Centre (AISC)** and the Government-funded **Artificial Intelligence Subsidy Scheme (AISS)**, both of which will play key roles in establishing the city as a new force for this game changing technology. Elsewhere, we continued to attract leading companies from around the world to establish operations on campus, further deepening and enhancing Hong Kong's I&T ecosystem. The state-of-the-art **Cyberport 5 expansion project** was topped out at the end of 2024, bringing this important part of Hong Kong's future I&T infrastructure one step closer to completion in 2025. Meanwhile, our talent development programmes continued to feed the pipeline of future I&T leaders.

Supporting the **AISC** is the AISS, a HK\$3 billion, three-year Government-funded initiative that provides financial support for eligible organisations seeking to utilise the AISC to achieve breakthroughs. As at July 2025, 15 projects had been approved for funding. In February 2025, Cyberport also signed a Memorandum of Understanding (MoU) with the World Digital Technology Academy and International Academicians Science & Technology Innovation Centre to promote best practices in AI safety, trust and responsibility.

The increasingly widespread application of AI means unprecedented challenges and opportunities for cybersecurity. Cyberport is committed to creating an advanced cybersecurity ecosystem for Hong Kong and has been working closely with the HKSAR government and the city's I&T industry to help enhance local cybersecurity capabilities. Currently, Cyberport brings together over 30 leading cybersecurity technology companies that offer a range of unique products and services, including AI-powered detection and analysis of vulnerabilities, risk assessment for large AI models, blockchain and digital asset security auditing, cryptocurrency attack tracking, and the provision of cyberthreat intelligence models. The LAE – economic activities in airspace below 1,000 metres – has become a major area of focus, and Cyberport is actively building a thriving LAE ecosystem to support this exciting new industry's development. As a venue partner for the **"Low-Altitude Economic Regulatory Sandbox"** pilot project, Cyberport is continuously optimising its drone take-off and landing facilities, and collaborating with air traffic management experts to install monitoring radar in preparation for future testing of the local low-altitude management system. Furthermore, Cyberport has launched dedicated sites for drone flight training and competitions to enhance the skills of relevant personnel in the region. Cyberport also provides different terrains and development densities to simulate diverse application scenarios and is expanding collaborations with various industry organisations and startups. This includes promoting the research and development and application of electric vertical take-off and landing aircraft (eVTOL) and conducting tests on hydrogen-powered drones to improve environmental performance.

FinTech

At over 440 companies, Cyberport hosts the largest FinTech community in Hong Kong. Many of these community members made a splash at ninth **Hong Kong FinTech Week**, with 30 promoting their solutions to more than 30,000 finance and technology professionals. During the event, we also announced the launch of the Cyberport Blockchain Support Portal (CBSP) to facilitate the landing of blockchain protocols in Hong Kong. Polkadot and Avalanche, the two leading protocols in the Web3.0 industry, were named as the initial partners.

We were once again the official FinTech partner of the **Asian Financial Forum**, where over 30 Cyberport start-ups shared their cutting-edge FinTech solutions with government, business and finance leaders. The event also marked the kick off of the **Green and Sustainable FinTech Proof-of-Concept Funding Support Scheme**, a project launched by the Financial Services and the Treasury Bureau and administered by Cyberport to promote green and sustainable FinTech development in Hong Kong. The year also saw Cyberport and two start-ups join the Hong Kong Monetary Authority's **Project Ensemble wCBDC (wholesale central bank digital currency) Sandbox**, where we are partnering in the "Green and Sustainable Finance" track in areas such as electric vehicle charging and alternative assets.

Digital Entertainment

Digital entertainment and e-sports hold massive appeal, particularly among younger demographics. The Cyberport cluster has around 170 start-ups and tech companies working in related areas like arts, culture, tourism, sports and more. To help this cluster grow, Cyberport once again organised the annual **Digital Entertainment Leadership Forum**, where more than 3,500 attendees participated in events inspired by the theme "Imaginary Fairground: AI-Powered Entertainment in the Web3.0 Era". Over 60 international and local industry leaders and celebrities also discussed the transformative potential of AI and Web3.0 technologies in shaping digital entertainment.

Expanding tech support to all corners of Hong Kong

As a digital technology hub and accelerator, one of Cyberport's most important roles is to champion technologies that can benefit businesses of all sectors and sizes. In 2024, the successful **Digital Transformation Support Pilot Programme (DTSP)**, a Policy Address initiative designed to help local small and medium enterprises (SMEs) adopt ready-to-use digital solutions in areas such as digital payment solution and shopfront sales, online promotion, and customer management and loyalty solutions, was expanded from retail and catering to tourism and personal services industries. As at July 2025, Cyberport received over 14,300 applications and over 8,400 applications were approved.

In 2024-25, we continued to attract top companies and talent from outside Hong Kong and help our start-ups expand their businesses in Chinese Mainland and abroad. Additionally, we assisted the settled leading enterprises in connecting with local and overseas companies, capital and markets, thus accelerating their internationalisation. Companies landing at Cyberport during the year were **iFLYTEK** and its subsidiary **Xunfei Healthcare** – who are establishing international headquarters at Cyberport – as well as Mainland AI powerhouse **Hong Kong Inspur Cloud** and hi-tech and generative AI leader **China Year**. During the year, both Xunfei Healthcare and **Dmall** successfully listed on the HKEx, demonstrating how companies that land at Cyberport can gain access to the global funding they need for accelerated growth and success. iFLYTEK, Xunfei Healthcare and China Year were also recognised as HKSAR Government Strategic Enterprise Partners.
