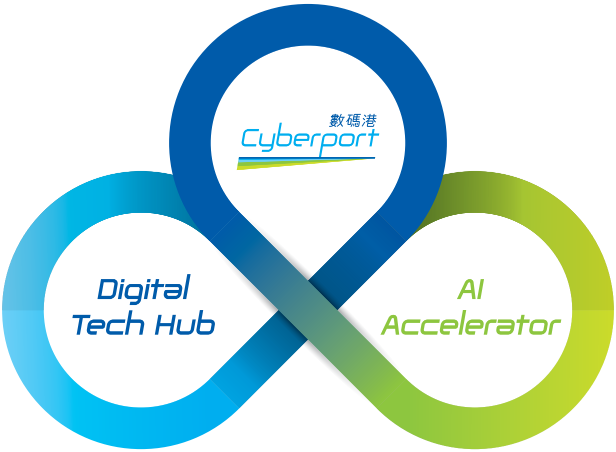
Aug 2026

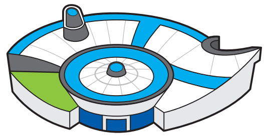
Cyberport is Hong Kong's digital tech hub and AI accelerator, with a vision to empower industry digitalisation and intelligent transformation, to promote digital economy and AI development, and to foster Hong Kong to be an international AI, innovation and technology (I&T) hub.

Strategic Focuses



- Empowering Digitalisation and Digital Innovation in Industries
- Accelerating AI Ecosystem Development and Industry Adoption
- Supporting the Development of Hong Kong's Digital Economy

Through tech clusters of AI, data science, blockchain and cybersecurity, Cyberport empowers industries across smart city and government, banking and finance, digital entertainment, culture and tourism, healthcare, education and training, property management, construction, transportation and logistics, and green environment and more.



Tech Clusters

- AI
- Data Science
- Blockchain
- Cybersecurity

Empowering Industries

- Smart City & Government
- Banking & Finance
- Healthcare
- Education & Training
- Green Environment
- Digital Entertainment
- Culture & Tourism
- Property Management
- Construction
- Transportation & Logistics

And more...

Comprehensive Ecosystem for Innovation & Entrepreneurship

Cyberport works closely with key stakeholders including venture capitalists, accelerators, universities, government authorities and regulators, professional service providers and major I&T enterprises to construct a healthy environment for a thriving start-up ecosystem.

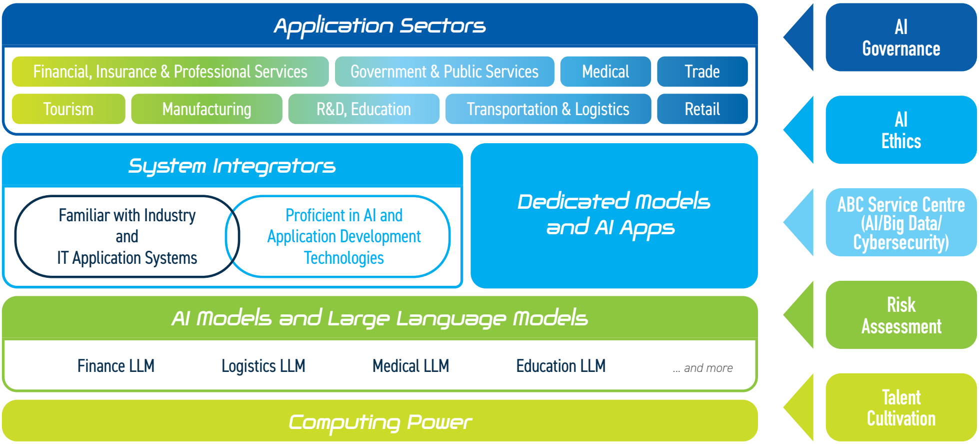
Hong Kong's AI Accelerator – Building a Thriving AI Ecosystem in Hong Kong

AISC
Supercomputing Centre

With Hong Kong's large-scale Artificial Intelligence Supercomputing Centre (AISC) as the engine, Cyberport is committed to creating a comprehensive AI ecosystem spanning computing power development, general and specialised large language models, model risk assessment, industry application support, governance and ethics research, talent cultivation, while gathering local, Mainland and overseas talents and resources to support innovation, R&D and application of AI across various industries, and promote AI industry development.



AI Subsidy Scheme

Details of AI Subsidy Scheme

With the $3 billion from the HKSAR Government, Cyberport was commissioned to implement AI Subsidy Scheme to support local institutions, R&D centres, Government bureaux and departments, AI start-ups, and strategic enterprises to leverage AISC computing resources to achieve scientific research and application breakthroughs with AI.

ABC Service Centre (AI/Big Data/Cybersecurity)

Cyberport ABC Centre provides a comprehensive platform that integrates artificial intelligence (AI), big data, and cybersecurity for startups and enterprises. It aims to fully support the research, development, and application transformation of enterprises, empowering various industries to upgrade through smart technologies. By providing AI and cybersecurity assessments, professional training workshops and courses, and expert consultancy services, the Centre enables enterprises to explore product innovation and technology integration. These efforts help apply smart solutions across different industries and scenarios, fostering the implementation of innovative technologies and the vibrant growth of the local AI ecosystem.

OPC HUB @ CYBERPORT

Details of OPC HUB @ CYBERPORT

OPC Hub @ Cyberport

The OPC Hub @ Cyberport is a dedicated launchpad for a new generation of companies — AI-native teams and solo individuals who fluently leverage frontier technologies including GenAI, autonomous agents and blockchain to operate, compete and scale far beyond their size. The emerging model is widely regarded as the One-Person Company (OPC). This hub at Cyberport is a home for these OPC ventures: a single branded gateway that channels members through an integrated platform spanning workspace, compute, training, events, partnerships and community networks.

Fueling Low-altitude Economy & Building Comprehensive Ecosystem

Cyberport was appointed by the HKSAR Government as the venue partner for the "Low-altitude Economy (LAE) Regulatory Sandbox", complimenting implementation of pilot projects to seize new opportunities brought by LAE and driving development of new quality productive forces.

Location & Infrastructure

Spacious outdoor areas and advanced IT facilities, including the Artificial Intelligence Supercomputing Centre (AISC) support pilot projects.

Support for Drone Operations

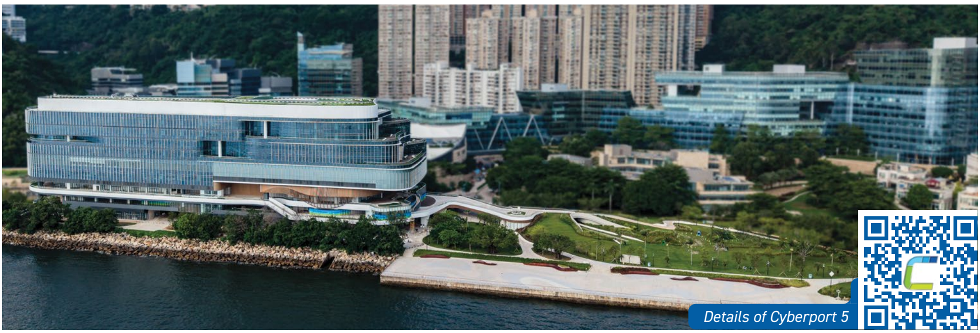
Comprehensive wireless network coverage, a dedicated data centre, charging facilities, and take-off and landing points support seamless drone flight tests across sea, land, and air.

Variety of Testing Environments

Areas with different terrains and development densities provide various application scenarios, to support low-altitude flight tests.

Cyberport 5 - Hong Kong's New I&T Landmark

The infrastructure offers a gross floor area of around 66,000 sqm, and provides offices and co-working spaces, a data service platform, a multifunction hall, smart office facilities and ancillary facilities, accommodating more I&T enterprises and showcasing their technology applications. Meanwhile, the waterfront park is enhanced with improved green landscape, smart and pet-friendly facilities, allowing the public to share a quality living brought by technology innovations and to build a harmonious and inclusive community together.



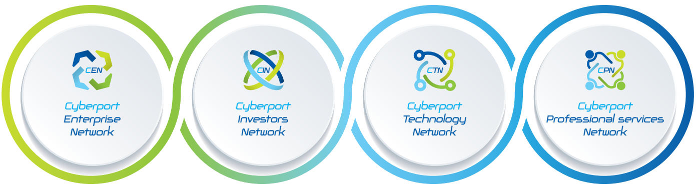
Hong Kong's Key Incubator

Cyberport fully backs up enterprising talents throughout the entrepreneurial journey, from start-up nurturing, seed funding, product commercialisation to business expansion and investment matching.

A Springboard to Success for Digital Tech Entrepreneurs

Cyberport supports entrepreneurs as a springboard to success, by:

- Connecting local enterprises to internationalise products & services
- Connecting to investments from local, Chinese Mainland & overseas
- Connecting overseas markets for expansion to South East Asia, Middle East, Europe & USA
- Connecting enterprises to get listed in Hong Kong & overseas



Academy

ENTREPRENEURIAL

- Career Programme / Job Placement
