Cyberport Enterprise Biren Technology Becomes "Hong Kong's First GPU Stock" with Market Capitalisation Exceeding HK$80 Billion

International Financing Drives Computing Power R&D Towards New Milestone

Hong Kong, 2 January 2026 – Cyberport congratulates Biren Technology (Stock Code: 06082.HK), a Cyberport unicorn and one of the first batch of HKSARG strategic enterprises, on its successful listing on the Main Board of the Hong Kong Stock Exchange (HKEX) today. The listing raised HK$5.583 billion, with a market capitalisation exceeding HK$80 billion, marking the birth of "Hong Kong's First GPU Stock" and Hong Kong's first listing of 2026. It is also the largest issuance under the Chapter 18C Specialist Technology Companies listing since its implementation. The successful listing of Biren Technology will accelerate its development of intelligent computing hardware and upgrades to its software platform, promoting the commercialisation of intelligent computing solutions, while demonstrating Hong Kong's role as a springboard for Chinese Mainland enterprises "going global", leveraging its unique advantages as a "super-connector" and "super value-adder".

Simon Chan, Chairman of Cyberport, said, "Since establishing its presence in Cyberport in 2023, Biren Technology has deepened cooperation with local AI enterprises and research institutions through Cyberport's global network and comprehensive I&T support platform, jointly developing innovative solutions and working together to promote the development of Hong Kong's AI industry and accelerate talent cultivation. At the same time, Biren Technology has actively promoted in-depth integration and collaborative development between the AI industries in Shanghai and Hong Kong, expanding technological innovation cooperation between the two cities. As Hong Kong's digital tech hub and AI accelerator, Cyberport, with its AI Supercomputing Centre (AISC) as the engine driving the AI ecosystem, actively attracts chip R&D companies, including Biren Technology, as well as multiple leading AI enterprises to enhance Hong Kong's computational capabilities and promote AI innovation and applications. We are honoured to witness Biren Technology's successful listing on the HKEX, which exemplifies Cyberport's commitment to leveraging Hong Kong's role as a 'super-connector' and 'super value-adder'. Looking ahead, Cyberport will continue to attract outstanding I&T enterprises to develop in Hong Kong, creating more growth and development opportunities for settled enterprises, and assisting them in taking root, expanding, and thriving in Hong Kong."

Zhang Wen, Founder, Chairman, and CEO of Biren Technology, said, "It is a great honour for Biren Technology to become the first company listed on the HKEX in 2026. I sincerely thank the HKSAR Government and Cyberport for their strong support. As one of the first batch of high-tech strategic enterprises introduced to Hong Kong and having established a presence in Cyberport, we have deeply felt Hong Kong's emphasis on deep technology innovation enterprises and the all-round support provided by Cyberport. Hong Kong's excellent business environment and efficient connection to global capital will serve as an important platform for Biren Technology and other companies to develop in Hong Kong. We will invest more resolutely in technological innovation and manage our enterprise operations more steadfastly, living up to the opportunities this era has given us."

Biren Technology was founded in 2019 and is a leading provider of general-purpose intelligent computing solutions, with its independently developed GPU products at the core, providing powerful, secure, and efficient computing infrastructure for various industries. The company adheres to an original core architecture, pioneers Chiplet high-computing-power chips, and has built a technology system with software-hardware collaborative innovation, committing to creating a domestic intelligent computing industry ecosystem and becoming a core engine of the development of China's AI industry.

As Hong Kong's digital tech hub and AI accelerator, Cyberport is committed to building a complete AI ecosystem, providing comprehensive support for AI innovation, R&D and industrialisation. Currently, Cyberport brings together over 500 start-ups specialising in AI and big data, and has attracted multiple leading AI enterprises to interact and collaborate with start-ups, combining capabilities in computing power development, large model construction, algorithms, and data science to jointly promote AI innovation and applications. Cyberport also actively supports the HKSAR Government's strategy for attracting enterprises and investment, having successfully introduced 20 enterprises selected as HKSARG strategic enterprises, and attracting multiple local and overseas listed companies, unicorns, and soonicorns to establish presences in Cyberport, gathering innovation capital, technology, and talent, promoting cutting-edge technology R&D and transformational applications, adding momentum to local I&T jobs, talent support and economic output. Including Biren Technology, Cyberport currently houses 16 listed companies and 8 unicorns. In the future, Cyberport will continue to leverage Hong Kong's unique advantages by connecting with the Chinese Mainland and the world, attracting more outstanding enterprises to establish presences at Cyberport, and assisting Hong Kong in advancing towards its goal of becoming an international I&T centre and AI hub.

About Hong Kong Cyberport

Wholly owned by the Hong Kong Special Administrative Region (HKSAR) Government, Cyberport is Hong Kong's digital tech hub and AI accelerator, with a vision to empower industry digitalisation and intelligent transformation, to promote digital economy and AI development, and to foster Hong Kong to be an international AI, innovation and technology (I&T) hub. Cyberport gathers over 2,300 companies, including 16 listed companies and 8 unicorns. One-third of onsite companies' founders come from 27 countries and regions, while Cyberport companies have expanded to over 35 global markets.

Cyberport, with Hong Kong's largest AI Supercomputing Centre and AI Lab as the engine, has been building the AI ecosystem with industry-leading AI companies and over 500 AI and data science start-ups. Through development of tech clusters, namely AI, data science, blockchain and cybersecurity, Cyberport empowers industries across smart city and government, banking and finance, digital entertainment, culture and tourism, healthcare, education and training, property management, construction, transportation and logistics, green environment and more, while hosting Hong Kong's largest FinTech community. Commissioned by the HKSAR Government, Cyberport has implemented proof-of-concept and sandbox schemes, subsidisation for digital tech adoption, industry tech training and start-up incubation, to drive technology R&D, translation and commercialisation, thus propelling digital transformation and intelligent upgrade across industry and society.

Also as "State-level Scientific and Technological Enterprise Incubator" and Hong Kong's key incubator, Cyberport supports entrepreneurs with funding and office space, extensive networks of enterprises, investors, technology corporations and professional services for business growth and expansion to Chinese Mainland and overseas markets, all-round facilitation for landing in Hong Kong, talent attraction and cultivation, ready as a launchpad to take start-ups in any stages of development to the next level.
