Cyberport Leads over 35 Start-ups at InnoEX 2026 Demonstrating "AI+" and Technology Capabilities to Drive I&T Industry Integration in the Northern Metropolis

Hong Kong, 16 April 2026 - Cyberport led over 35 start-ups to join the four-day **Hong Kong International Innovation and Technology Expo 2026 (InnoEX 2026)**, held from 13 to 16 April at the Hong Kong Convention and Exhibition Centre, with 20 start-ups exhibiting at the Cyberport Pavilion, showcasing diverse, cutting-edge solutions in areas such as smart construction, safety monitoring, urban data management, smart aging, business intelligence, and digital transformation, demonstrating the remarkable achievements of Hong Kong and Cyberport in advancing "AI+" development.

Ir Eric Chan, Chief Public Mission Officer of Cyberport, said: "As Hong Kong's digital tech hub and AI accelerator, Cyberport brings together over 500 companies specialising in artificial intelligence, big data and robotics, actively driving the deep integration of AI with industries and accelerating the adoption of 'AI+' across sectors. InnoEX not only provides Cyberport's community members with a crucial and valuable platform to expand into international markets but also facilitates exchange and collaboration with global business leaders, investors and industry experts to jointly explore new innovation and technology opportunities. Cyberport will continue to strengthen its I&T ecosystem and advance the development of emerging technologies, including artificial intelligence, blockchain, data science and the low-altitude economy, supporting Hong Kong's development as an international innovation and technology centre."

InnoEX 2026 brings together industry leaders to envision the future of innovation and technology. **Henry Li, Head of Industry Partnership of Cyberport**, today participated in a panel discussion entitled "**Innovation and Technology Ecosystem in the Northern Metropolis**", engaging in in-depth exchanges with representatives from Our Hong Kong Foundation, the Hong Kong Housing Society (HKHS), and start-ups [Billie Onsite](#) and [Alpha AI](#).

The session focused on the I&T opportunities in the Northern Metropolis. Sharing a strong optimism for the region's potential, Cyberport and HKHS established a co-working space in the area years ago. During the panel, the two start-ups shared how they leveraged the networks of both organizations to directly apply their innovative technologies to construction and property management workflows. Looking ahead, they expressed their hopes to further integrate their solutions into Northern Metropolis development projects to drive industrial upgrading, implement smart city applications, and foster cross-sector integration.

During the Expo, Cyberport community members also had two Start-up Speaking Sessions, presenting their innovative solutions across artificial intelligence, EdTech, HealthTech and smart construction to industry representatives, strategic partners and potential investors, facilitating business connections and supporting the acceleration of their expansion into international markets.

InnoEX 2026 is jointly organised by the Innovation, Technology and Industry Bureau of the Hong Kong Special Administrative Region Government and the Hong Kong Trade Development Council. Themed "Innovate · Automate · Elevate", the Expo focuses on five key areas: AI+, Robotics, Low-altitude Economy, Property Technology, and Retail Technology, providing a vital platform for global business and industry leaders to explore collaboration and exchange opportunities.

Cyberport Pavilion Exhibitor List (in alphabetical order):

	Company Name	Description
1	<u>Alpha AI Technology</u>	Alpha AI Technology leverages artificial intelligence and 3D technology to identify slope defects, conduct maintenance inspections for buildings and infrastructure, and perform safety patrols.
2	<u>Ambit Geospatial Solution Limited</u>	AMBIT is Hong Kong's leading urban big data provider, capturing high-resolution 3D city data via drones, airborne sensors, and mobile mapping systems. It provides end-to-end smart city solutions that combine patented technologies and 3D GIS expertise to support urban planning, risk management, tree management, and autonomous driving.
3	<u>AT-Vibe Technology Limited</u>	AT-Vibe Technology Limited leverages diverse detection, analysis, and monitoring systems alongside private AI to prevent incidents and build smarter, safer cities. Solutions include Edge Computing, 4S Smart Site Safety, IoT Central Monitoring Platform, Confined Space Monitoring, and Enterprise Private AI Server (PAIB).
4	<u>Billie Onsite</u>	Billie leverages an AI-powered platform to digitize the field-to-office workflow, minimizing errors and enhancing construction inspection productivity. Solutions include defect root cause analysis, multimodal data capture, AI summarization and tagging, a Document AI Agent, and automated report generation.
5	<u>Dai3mimi Health-Tech Limited</u>	Dai3mimi – Where Hearing Becomes Understanding. By combining material conduction technology with AI-powered sound optimization, it transmits audio directly into the inner ear while intelligently adapting to environments. This transforms raw sound into clear,

		meaningful comprehension. No amplification required.
6	Datality Lab Limited	Datality Lab Limited is an EdTech company specializing in AI-powered communication and presentation training. Blends AI, decision science & applied psychology; Moodie.ai SaaS platform: practice presentations, interviews, workplace communication & teaching in virtual scenarios; Customizable AI avatars for one-way or interactive dialogues; Multi-modal analysis of content, facial, voice & body language; Features: custom rubrics, RAG, progress tracking, admin portal, and one-touch aggregated analysis
7	ESIGN HK HOLDING LIMITED	eSignGlobal is Asia's leading eSignature solutions provider, revolutionizing how organizations manage digital transactions. Headquartered in Hangzhou with its international headquarters in Hong Kong, its market share ranks first in Asia-Pacific and sixth globally. The company's comprehensive services cover over 200 countries and regions, supported by state-of-the-art data centers in Hong Kong, Singapore, and Frankfurt, earning it a spot on the Hurun Global Unicorn List for five consecutive years.
8	Filix Medtech Limited	Filix Medtech provides Traceability of Origin and Product Traceability solutions for applications such as construction materials, enhancing transparency and site management. The company leverages RFID, mmWave radar, patented scene analysis, blockchain-based track-and-trace technology, and mobile spectral sensors to enable rapid on-site product quality inspections.
9	GENESIS ONE LIMITED	Genesis One provides a comprehensive digital ecosystem that empowers creators and businesses to accelerate brand creation and transform ideas into physical products without upfront inventory investment. Solutions include advanced 3D and AI design tools, an integrated marketplace, virtual storefronts, and on-

		demand manufacturing with direct-to-consumer fulfillment.
10	iTrendForce	iTrendForce is an AI and data-driven software platform and service provider that assists organizations in transforming fragmented, siloed data into actionable business insights. Through its Ari causal AI for data integration and analysis, alongside Aiva AI for video analysis, the company delivers full-scenario, quantifiable commercial deployments for its clients.
11	LAIYE	Laiye empowers government and enterprise clients to drive digital transformation and build large language model (LLM)-driven digital workforces. Products include Agentic Process Automation (APA), Agentic Document Processing (ADP) and Agentic Customer Experience (ACX).
12	Laurry AI	Laurry AI is an award-winning, Hong Kong-based AI specialist company providing tailored AI solutions for governments, schools, and enterprises. The company's core offerings include the IDEAS engine for automated document processing and vetting, the Eva Speak conversational AI platform for language training and professional assessments, and custom multi-agent Document AI systems for diverse automation needs.
13	Linked-Technologies Limited	Linked Technologies was supported by the Cyberport Incubation Programme and focuses on IoT system integration. The company provides smart building sensing and management solutions, supported by its own servers and remote-control platform. Its technologies are deployed across commercial, industrial, and campus environments to enhance safety, operational visibility, and facility management efficiency.
14	Muuse Limited	Muuse is a tech-powered reuse platform replacing

		single-use packaging with smart, trackable containers, enabling scalable circular systems across business districts, tourist locations and events. Its vision is to make reuse second nature at scale, enabling smart cities with their tech solution.
15	R2C2 Limited	R2C2 is an Embodied AI company automating dangerous inspection work. It offers the R2C2 ARC robot brain and ARII fleet platform for cross-brand collaboration. Trusted by infrastructure operators and government agencies, its solutions boost efficiency with 99% accuracy and 30% staff savings. ARII also won a CES 2025 Innovation Award.
16	Smart Interactive Limited	Smart Interactive Limited leverages IoT and AI technologies to enhance elderly living and foster an inclusive, intergenerational smart ecosystem. Through innovative solutions — including AI-powered scent and relaxation products — the company empowers seniors to live independently while creating calming environments that promote well-being and stronger community connections.
17	SmartAge Intelligence Limited	SmartAge brings the future of preventive care for older adults, supporting aging in place. By combining innovative smart home technology and telenursing services powered by SmartAge AI, SmartAge detects health risks early and enables timely intervention for older adults. SmartAge keeps older adults safe and healthy while keeping families informed, providing true peace of mind.
18	Team Concepts Limited	Team Concepts is a total solution provider for HSEQ (Health, Safety, Environment, and Quality) digital transformation and AIoT hardware and software management systems. Serving enterprise and government clients, the company has delivered over 100 projects across construction, utilities, property management, and elderly care to provide insightful

		environmental monitoring, enhance worker safety, and improve operational efficiency and workflows.
19	TradeMonday	TradeMonday AI is a full-cycle AI sales agent platform powered by patented data processing and generative AI. Capable of being deployed in just 10 minutes, the solution unifies enterprise and external data to automate prospecting, enable dynamic pricing, and eliminate margin leakage, delivering immediate ROI and up to 25% revenue growth.
20	VoiceAI Technologies	VoiceAI is a leading provider of full-stack AI-voice products and solutions, specializing in audio processing and speech analysis for finance, smart vehicles, and IoT applications. Leveraging patented technologies, the company empowers renowned enterprises and government institutions worldwide to enhance profitability, security risk management, and the overall customer experience.

About Hong Kong Cyberport

Wholly owned by the Hong Kong Special Administrative Region (HKSAR) Government, Cyberport is Hong Kong's digital tech hub and AI accelerator, with a vision to empower industry digitalisation and intelligent transformation, to promote digital economy and AI development, and to foster Hong Kong to be an international AI, innovation and technology (I&T) hub. Cyberport gathers over 2,300 companies, including 17 listed companies and 8 unicorns. One-third of onsite companies' founders come from 27 countries and regions, while Cyberport companies have expanded to over 35 global markets.

Cyberport, with Hong Kong's largest AI Supercomputing Centre and AI Lab as the engine, has been building the AI ecosystem with industry-leading AI companies and over 500 AI and data science start-ups. Through development of tech clusters, namely AI, data science, blockchain and cybersecurity, Cyberport empowers industries across smart city and government, banking and finance, digital entertainment, culture and tourism, healthcare, education and training, property management, construction, transportation and logistics, green environment and more, while hosting Hong Kong's largest FinTech community. Commissioned by the HKSAR Government, Cyberport has implemented proof-of-concept and sandbox schemes, subsidisation for digital tech adoption, industry tech training and start-up incubation, to drive technology R&D, translation and commercialisation, thus propelling digital transformation and intelligent upgrade across industry and society.

Also as "State-level Scientific and Technological Enterprise Incubator" and Hong Kong's key incubator, Cyberport supports entrepreneurs with funding and office space, extensive networks of enterprises, investors, technology corporations and professional services for business growth and expansion to Chinese Mainland and overseas markets, all-round facilitation for landing in Hong Kong, talent attraction and cultivation, ready as a launchpad to take start-ups in any stages of development to the next level.
